PROJECT PROFILE

Vladimir Kuz'min
architect

'Cabinet' Mayada

Vladimir Kuzmin is a notable figure in the architectural design community, a practitioner and tutor for the Chair of urban environment design in MARHI, winner of the Russian State Prize for the Design category and the «Golden section» in a professional architecture contest.

The essence of Profile is the side-view, the sections, the cut, a set of characteristics, the combination of horizons, and an outlined imagination. It offers custom selection of modular units for the workplace.

The Profile collection is an attempt to create simple items of obvious and architectural form, without any external domination by a designer and his «design». The quality and features of the material determine the facility's appearance, design, and aesthetic characteristics. This brings the solution to the conceptual purity of the module and transforms it into a product.

Vladimir Kuz'min:

«The Profile collection concept is to utilize minimal means by a single approach to produce a clear and explicit form without decorative twists... To do that, we used carbon, a super material which guarantees the required ease and clarity of a solution. Absolute quality! While preparing the

Profile collection, we were inspired by the curiosity and interest paid to the engineering process. We were inspired by a creative desire and were eager in our quest. We were inspired by Love. All of these are the eternal elements which help us turn all architectural designs into reality».
